

The scatter plot displays the relationship between Sackhole Depth (cm) on the x-axis and Sackhole Volume (cm³) on the y-axis. The x-axis ranges from 0 to 160 cm, and the y-axis ranges from 0 to 100 cm³. Three data series are plotted: Sackhole Top (40 cm) in blue, Sackhole Middle (70 cm) in orange, and Sackhole Bottom (160 cm) in green. The data points show a positive correlation between depth and volume, with the Sackhole Bottom series having the highest volume values and the Sackhole Top series having the lowest.

Sample	Sackhole Depth (cm)	Sackhole Volume (cm³)
Sackhole Top (40 cm)	40	~10
Sackhole Middle (70 cm)	70	~20
Sackhole Bottom (160 cm)	160	~80
